

NEWS RELEASE

For Immediate Release

e-zynet Releases 100Mbps 4 mile point to point wireless network bridge system.

November 16, 2010 – Draper, Utah – e-zynet announces the release of the EZ-Bridge Ultra5™ 5GHz 802.11a/n wireless point to point plug and play bridge system. Real world throughput is up to 100Mbit per second and useable range is up to 4+ miles with the integrated 19dBi antenna. The antenna is very compact at only 13" overall diameter. It can mount directly to a pole with a diameter up to 2.25" or to a vertical surface such as a wall, tower leg or telephone pole with the included universal wall mount bracket.

It's the perfect solution for creating a link between two buildings. The bridge system is preconfigured to be truly plug and play. Just connect the cables and power supplies and connect to a router, hub, switch, PC or any other Ethernet enabled device and the EZ-Bridge Ultra5™ will automatically create a bridged connection. The advanced full function software creates a transparent bridge , passing MAC, VLAN and VOIP traffic seamlessly. The built-in antenna alignment utility helps to get peak performance by optimizing antenna gain during installation. The antennas can be installed with horizontal or vertical polarity to help avoid any existing interference at the site.

"This is an exciting product, delivering extremely high wireless bandwidth at a very reasonable price. " said Scott Parsons, CEO. "Customers used to have to pay \$5,000 to \$10,000 or more to get this kind of bandwidth, but now with this advanced 802.11n TDMA MIMO technology we can provide a complete system for under \$600. This new point to point bridge solves most of the issues IT managers have had with linking sites together with typical WiFi equipment."

The new EZ-Bridge Ultra5™ is a 250mW transmit power system which meets 802.11a/n industry standards for interoperability. The complete system comes with two integrated radio/antennas, UV protected radome to protect the antennas and provide more consistent performance in the presence of ice and snow, two 75' rolls of outdoor rated shielded CAT5 cable assemblies, two 110/220VAC to 24VDC Power Over Ethernet power supply/injectors and two universal wall mount brackets.

*** MSRP Starting at \$599**

About e-zynet

e-zynet designs and manufactures both short and long range high speed wireless communications products.

The company's indoor and outdoor WLAN products are standards based to insure interoperability. In addition to a line of standard 802.11 products, e-zynet also develops customized wireless products to meet specific OEM customer requirements. Headquartered in Veria, Greece, e-zynet also has offices and warehouse facilities in the USA and representatives worldwide.
