

Adding replacement EZ-Bridge LT5 Unit

If replacing Unit B 192.168.1.239

1. Open Unit A 192.168.1.139 web server in your browser.
2. **Switch to Advanced WEB**
3. Select **Access Control** in the **WIRELESS** menu
4. Add unit B's MAC address in the box labeled **FROM**. Leave the **TO** box blank. When entering the MAC address do not enter the ":", just the numbers and letters.
5. Click **Apply Changes**.
6. Unit B should automatically sync to Unit A. If any problem, power cycle both units.
